ABOUT US

Smart Global Technologies is a UAE based provider of Strategic Security, Surveillance, Networking, Integration and Automation Solutions designed specifically for small, medium and large enterprise organizations.

Our solution-based services are founded on mature internal competencies in IP Communication, IP Telephony, Security and CCTV Systems, Access Control, Time & Attendance and Face ID, Home Automation (smart homes / smart offices), Lighting Control Audio Video, Guest Room Management Systems (GRMS) and BMS.

We are redefining the level of our services to a higher quality standard to provide efficient, reliable and cost effective solutions in the local market.

SECURITY AND SURVEILLANCE SYSTEMS

Smart Global provides a complete range of solutions for a broad spectrum of industry segments and applications. Whether you need a few cameras, Analog or IP, our solutions are easy to install and easy to adapt to changing needs. With our long experience and proven track record in network video technology, you can be assured that Smart Global will enable you to achieve your surveillance & security ambitions.

Smart Global offers a wide selection of Analog & IP cameras designed for security surveillance in a wide variety of commercial and industrial settings including offices and commercial spaces, schools and hospitals, banks and financial institutions, casinos, hotels and restaurants, stores, malls and shopping centers, city centers, warehouses, power plants, and other challenging indoor and outdoor environments

**APPROVED AND AUTHORIZED
SECURITY SYSTEMS & CAMARA INSTALLER**

ANPR-CAMERA SYSTEM

ANPR Camera systems are used to capture and save the picture of the license plate of a moving vehicle. Automatic number plate camera system is able to scan vehicle number plate and then check them against the data saved in database for security purpose. These cameras are generally used in security controlled areas and car park monitoring.

Automatic number plate recognition cameras are generally used by police forces and security personnel to identify the stolen vehicle. Enhanced intelligence of ANPR Cameras can be used to automate access control systems, to improve the road safety and to give better security and prevention.

Our ANPR systems can be used as carry through or fully integrated with your systems. At CASS Parking we have customized each and every ANPR camera system to conform to specific industry requirements that vary from electronic toll collecting, parking management, access controls, revenue controlling, intelligent systems, traffic monitoring wings and public safety.

ANPR System is also recognized as:

Automatic Number Plate Recognition (ANPR)

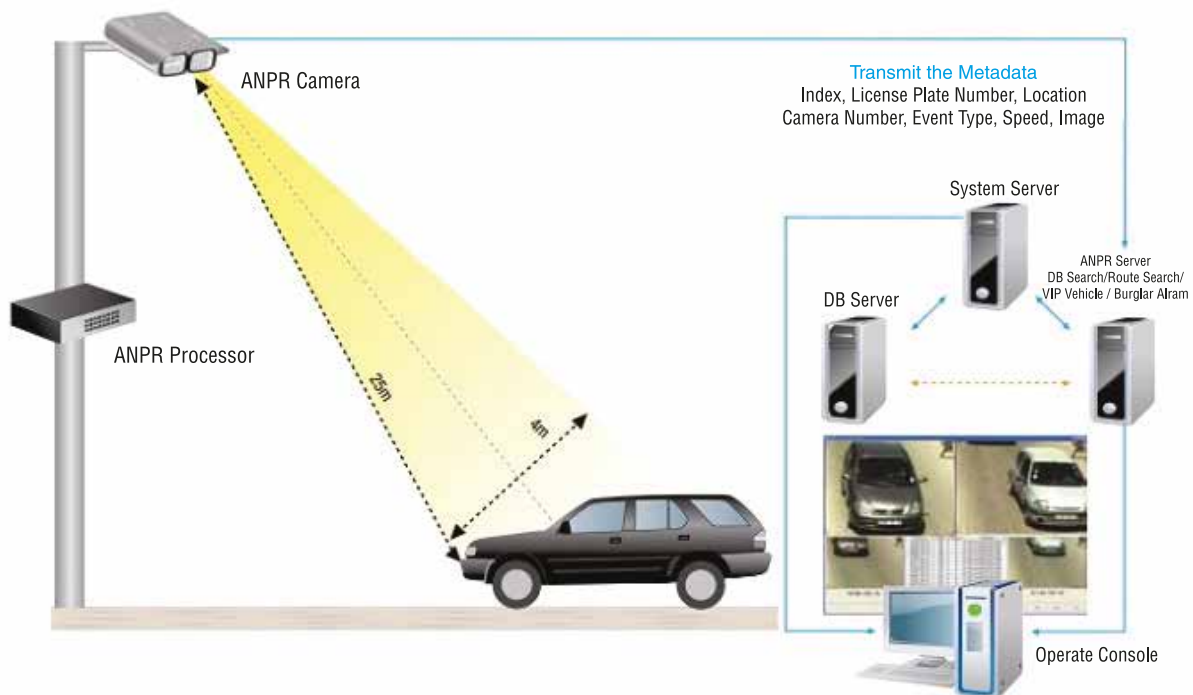

License Plate Recognition (LPR)

Number Plate Recognition (NPR)

Automatic License Plate Recognition (ALPR)

AUTOMATIC NUMBER PLATE RECOGNITION (ANPR)

PARKING MANAGEMENT SYSTEM

Accurate parking management system can be installed in several types of environments to supervise and assemble information. This accurate information is used by drivers to simplify their search to find an unoccupied space in order to manage traffic when congestion is discovered. Accurate parking system consists of a centralized supervisory system to maintain a database of unoccupied spaces. Intelligent parking management system can easily recognize the vehicle when parked in a parking facility by communicating with the server and display the result on counting display board. These counting display boards are cost effective and come with better accuracy. Display boards are installed between each section to enhance the ease of vehicle parking.

AUTOMATIC GATE BARRIER

STRUCTURED CABLING/ FIBER CABLING

The cable infrastructure in your office or building is a critical component of your entire network communication. Proper Planning, design, installation, and maintenance of this infrastructure can have a positive impact on your company's day-to-day operations and can contribute to its success. Smart Global Solutions design and build flexible cabling infrastructures that support data, voice, and Surveillance, Video and Multimedia systems. We will help you to evaluate, design and install optimum integrated system for your company / organization's needs voice and data cabling, structured cabling, ethernet cabling, wiring, network cables, copper or fiber wiring in the walls.

Since the structured cabling infrastructure is the most critical part of your voice and data network, choosing a qualified voice and data cabling provider is a critical decision. Smart Global Technologies installs all of its projects to TIA/EIA-568 C, IEEE and BICSI standards with certified installers.

DATA CENTER/SERVERS AND STORAGE SYSTEMS

Smart Global provides comprehensive design and integration services to increase the robustness and reliability of our clients distributed computing environments. Our engineers and consultants focus on data processing, clustering, storage area networks, load balancing and managing the operating system software that enables mission critical applications and other high level services.

System Assessment

- Servers
- Storage Area Network (SAN) Architecture
- Disaster Recovery (DR)

BMS-BUILDING MANAGEMENT SYSTEMS

BMS systems are “Intelligent” microprocessor based controller networks installed to monitor and control a building’s technical systems and services such as air conditioning, ventilation, lighting and hydraulics.

CONTROL ON
YOUR
FINGER TIPS

- More specifically they link the functionality of individual pieces of building equipment so that they operate as one complete integrated system.
- Now installed in every major building or facility with the availability of direct integration into all other building services such as security, access control, CCTV, fire, Lifts and other life and safety systems.
- Current generation BMS systems are now based on open communications protocols and are WEB enabled allowing integration of systems from multiple system vendors and access from anywhere in the world.

PUBLIC ADDRESSING SYSTEM

Public Address System is an electronic sound amplification and distribution system with a microphone, amplifier and loudspeakers, used to allow a person to address a large public, for example for announcements of movements at large and noisy air terminals, warehouse, factory etc.

AUDIO VIDEO CONFERENCING SYSTEM

Audio & Video collaboration is expanding across all industries. Give your employees and clients the ability to share multimedia content and communicate effectively over distances and across devices. At Smart Global Technologies, we offer industry leading virtual meeting technology to help you foster collaboration across your organization and maximize business results. Experience the power of Polycom HD video and content collaboration combined with the ease and familiarity of Office 365 and Skype for Business.

IP TELEPHONE AND PABX SYSTEMS

Smart Global holds a great reputation in the world of information technology services and telephone systems. Our services are unmatched because we are continuously striving for perfection. We offer you highly competent support and business telephone systems across the UAE.

HOME AUTOMATION - SMART HOME SOLUTIONS

Smart Global offers smart home automation solutions so that you can create your ideal living space. Smart home technologies can naturally merge into our daily life. connects your lights, curtains, air conditioners and other devices into the system, and allows you to control them through your smart phone, tablet, or wall panel.

BIOMETRIC, INTERCOM ACCESS CONTROL SYSTEM

- Fingerprint Access Control System
- Face Recognizing Access System
- RFID Access Control System
- Vehicle Access Control System
- Time Attendance Machines
- Video Door Phones

COMPUTER COMPONENTS SALES AND SERVICES

Today's consumers use many different channels to compare and buy products and services. They expect retailers to provide fast, consistent and seamless interactions at stores, online and via mobile devices. Smart Global Technologies helps retailers transform their technology to gain a 360-degree view of consumers and serve them across the entire purchase process using retail supply management and retail consulting. With greater visibility into the customer experience, you improve operational efficiencies, increase order fulfillment and encourage collaboration between stores and supply chain partners. We sell all the IT products and Services.

ANNUAL MAINTENANCE CONTRACT (AMC)

It is essential for a business to have some form of IT support. Smart Global Technologies provides cost effective IT Maintenance, ELV Maintenance Services, CCTV Maintenance, Access control Maintenance Service, On-Demand Service, Preventive Maintenance and Annual Maintenance Services.

Smart Global Technologies Annual Maintenance Services companies can establish a safe and secure technology environment, aligned with the business infrastructure, industry standards, authority compliance, and latest updates.

- Our team of trained technicians and engineers are available for breakdown and preventive maintenance 24x7, giving you the peace of mind to focus on your core business.

- The organization has invested in relevant workflow and team collaboration systems that provide quick and accurate information flow to support our field team for Annual Maintenance Services. A structured escalation matrix and supervision from subject matter experts and service leaders from the industry ensures quick corrective and preventive action for minimum downtime

We highly recommend regular preventive checks and get annual maintenance services by our specialists. We focus on 'predict and prevent', rather than 'detect and repair', and highly recommend regular preventive checks and maintenance by specialists for minimum downtime and control.

IT MAINTENANCE AND ELV-MAINTENANCE SERVICES

- On Demand Service

Whatever be your technology requirement, Smart Global Technologies is just a call away as we provide excellent IT, CCTV, ELV, and Annual Maintenance Services in the UAE. We offer clients the flexibility to request ad-hoc services, products, and solutions. Our IT team will be available to facilitate the same with quick design, turnaround and immediate delivery options.

- Preventive Maintenance

It's better to be safe than sorry. From the entire range of technology solutions and products, we have specialized in IT maintenance and CCTV maintenance services. Our experienced team is well aware of the best practices and maintenance procedures set by various manufacturers and applies them to maintain the health of your equipment. We check for red alert issues and take appropriate measures to ensure the threat is eliminated and systems are protected, serviced, and maintained.
